

GETTING STARTED WITH YOUR FIBRE MOOD PATTERN

INSTRUCTIONS

All Fibre Mood instructions are housed on our [website](#). You will need to login to your account and then type the pattern name into the search bar. Click the pattern page and you will see the instructions.

HOW TO USE YOUR PATTERN

Digital patterns come in PDF format. You can either print your pattern at home, or ask a copyshop to print it in A0 format.

Downloading your pattern

When you open the ZIP file, you will see 3 individual PDF files.

- **A4-US-LETTER:** Use this file to print at home on either A4 or US letter paper (it is the same file). If you use US letter paper, the borders will be smaller than if you printed on A4.
- **A0-ONLY-SA:** A0 size files for the copyshop, with only cutting lines (i.e. seam allowances are included).
- **A0:** A0 size files for the copyshop, including both cutting lines (solid lines) and stitching lines (dashed lines).

Printing your pattern

Each file contains “layers” to allow you to choose to print only the size(s) that you want, and with or without seam allowances. Watch the video [here](#) to see how.

We recommend that you print your size with both stitching lines and cutting lines. Please refer to the section on choosing the correct size [here](#).

Note! You need to check with your copyshop if they will print A0 files in layers. If they do not print layers, then you may find it easier to choose to print the A0-ONLY-SA file which only contains the cutting lines.

SEAM ALLOWANCE INFORMATION

Seam allowances are typically 1cm (or $\frac{3}{8}$ "). However to help you get the best finish, they may sometimes differ (e.g. for necklines and hems). Each seam allowance is specified in the instructions, check the numbers around each pattern piece on page 3. For example here you can see there are seam allowances of 0 and 1cm ($\frac{3}{8}$ in).

SIZING INFORMATION

We provide UK, EUR and US sizing. The sizing information (body measurements and finished garment measurements) for each pattern is included in the instructions. The general body measurements chart for all 3 sizing types can be found [here](#).

Do you want to shorten or lengthen parts of the pattern? Maybe the sleeve is too long, the bodice is too short, or the skirt is too long or something like that. Page 3 of each instruction file shows you how and where to cut (the shorten and lengthen lines are not marked on the pattern itself).
